LDDS System Test Environment

Server-side version upgrade special testing plan

I. Scheme Overview

In accordance with the LDDS system server version upgrade arrangements, our company plans to conduct special tests in the LDDS system parallel testing environment and all-weather testing environment from now until November 6th (Friday). **This upgrade only involves server version optimization; there are no adjustments to the LDDS system's external interface specifications.**

II. Participating Units

1. SSE InfoNet Ltd.
2. License market data information vendors and securities firms.

III. Test Content

This test aims to verify the reception and processing of static files, Level-2 market data, and Level -1 market data after the server version upgrade.

It is recommended that all units arrange testing and verification in both parallel testing environments and all-weather testing environments.

IV. Test Feedback Content

1. Verification of the reception and processing status of pre-market static files (such as cpxx, fjy, etc.);

2. Level -2 market data reception and processing status;

3. Level -1 market data reception and processing status.

V. Test Schedule

Auction Quotes		Comprehensive business platform	
9:15-9:25	Opening call auction	9:15-9:30	Opening call auction
9:30-11:30	Continuous call auction	9:30-11:30	Continuous call auction
13:00-14:57	Continuous call auction	13:00-15:00	Continuous call auction

15:00-15:30	Related business processing		
New bond trading platform			
9:15-9:25	Opening call auction		
9:30-11:30	Continuous call auction		
13:00-15:00	Continuous call auction		
15:00-15:30	Bond repurchase transactions extended		

VI. Test Data

The test data is based on the actual data provided by each test environment of the LDDS system.

VII. Test Requirements

1. During the testing process, all participating information providers should record the test phenomena and results in detail and check their accuracy. If any abnormalities are found, please report them promptly.

2. All participating units must ensure the isolation between the testing environment and the production environment to prevent test data from affecting production.

3. After the test is completed, each participating unit should carefully fill out and submit feedback.

4. Participating units must submit test feedback before 12:00 on November 6 to: https://form.idata.com.hk/single/gigF4PEf
