
LDDS system production environment test solution (July 27 , 2024)

1. Project Overview

In order to smoothly promote the relevant adjustments of the LDDS system market network upgrade , our company now plans to organize a full-network test of the LDDS system network environment upgrade adjustment from 9:00 to 12:00 on July 27 , 2024 (Saturday) .

2. Test Units

1. SSEInfonet
2. Level-2 directly connects to information providers and securities firms .

3. Test content

Send Level-2 market information (auction, bonds , comprehensive industry), Level-1 market information (auction, bonds , comprehensive industry), fixed income market information , etc. through the LDDS system

production environment.

During this test , our company will upgrade and adjust the network environment of **the Jinqiao (Telecom) line** of the LDDS system , affecting dedicated line and core institutional access network users. Please verify the reception and processing of Level-2, Level-1, fixed income and other market conditions. If there is any abnormality in the reception of market data during the test , please provide feedback in time and cooperate with our company to investigate the abnormality .

At the same time, this test is expected to adjust the configuration of the core institution access network Jinqiao (Telecom) line network at around 10:40 on the test day . The adjustment is expected to last about 20 minutes . During the adjustment, the core institution access network Jinqiao (Telecom) line market access will be interrupted. Please pay attention to this, all participating units.

4. Test Feedback Content

1. Static file reception and processing are normal (cpxx , fjy series files);
2. Level-2 market information reception and processing (before and after network adjustment);

3. Level-2 tick-by-tick market replenishment processing (before and after network adjustment) ;

4. Level-1 market information reception and processing (before and after network adjustment);

5. Fixed income market information reception and processing (if authorized) ;

6. The system recovers normally.

5. Test schedule

The test time is from 9:00 to 12:00 on July 27 , 2024 .

The testing schedule is as follows:

	Bidding Quotes		Comprehensive business situation	
1	9:15-9:25	Opening Auction	9:15-9:25	Call Auction

5. Test Data

In this test, the LDDS system production environment uses the data after the end-of-day processing of all securities in the Shanghai Stock Exchange on July 26, 2024 (Friday) as the starting data for the test.

6. Test requirements

1. Each participating information provider must do a good job of protecting the production system environment before testing, and do a good job of restoring the environment after testing. Please note that the test data cannot be released to the public.

2. During the test, all participating information providers are requested to record the test phenomena and results in detail and check their correctness. If any

abnormal phenomenon is found, it should be reported in time.

3. Level-2 core institutional access network and dedicated line users must participate in this test . Other users can evaluate whether to participate .

4. After the test is completed, each participating information provider shall submit test feedback carefully and promptly.
