4	11:30-12:00	Bond repurchase transactions extended		
5	12:00-14:00	market closing		

2. Participating units

1. SSE InfoNet

2. Level-2 is directly connected to information providers and securities companies.

3. Test content

Send Level-2 market information (bidding, bonds, comprehensive industry), Level-1 market information (bidding, bonds, comprehensive industry), etc. through the LDDS system production environment.

a. The second batch of upgrades to the LDDS system server version

VDE direct-connect users focus on verifying the Level-2 market reception and processing of TKO's main source line, including dedicated line access and core institution access network access.

b. Conventional test content

Routinely verify the reception and processing of static files, Level-2, Level-1 and other market prices.

4. Test feedback content

1. Static files are received and processed normally (cpxx, fyy series files);
2. The reception and processing of TKO's main source line market information;
3. Level-2 market quotation reception and processing;
4. Level-1 market quotation reception and processing;
5. The system recovers normally.

5. Test data

In this test, the LDDS system production environment used the end-of-day processing data of all securities in the Shanghai Stock Exchange on November 1, 2024 (Friday) as the starting data for the test.

6. Testing requirements

- Do not distribute testing data to end user
- All information vendors must prepare system backup in Production and Test environment before the test.
- During the test, client should write down their comments or technical issues for analysis & follow up. Client should report to “CIIS” in case any error or abnormal situation cause on this test.
- **All Level-2 direct-connected users are required to participate in this test.**

7. Contact information

Jeffrey Cheung: 2503 3681
