2. Participating units

- a. SSE Information Network Co., Ltd.
- b. Level-2 directly connected information providers and securities companies.

3. Test content

Send Level-2 market information (bidding, bonds, comprehensive industry), Level-1 market information (bidding, bonds, comprehensive industry), etc. through the LDDS system production environment.

a. The third batch of upgrades to the LDDS system server version

VDE direct-connect users focus on verifying the Level-2 market reception and processing status of ALC backup source lines, including dedicated line access and core institution access network access.

b. Cooperate with the upstream bidding platform to optimize customs clearance testing

Focus on verifying the reception and processing of bidding quotations (including Level-1 and Level-2) in the LDDS system.

c. General test content

Routinely verify the reception and processing of static files, Level-2, Level-1 and other market prices.

4. Test feedback content

a. Static files are received and processed normally (cpxx, fjy series files);

b. ALC backup source line quotation reception and processing situation;

c. Level-2 market quotation reception and processing;

d. Level-1 market quotation reception and processing;

e. The system recovers normally.

5. Test data

In this test, the LDDS system production environment used the end-of-day processing data of all securities in the Shanghai Stock Exchange on November 8, 2024 (Friday) as the starting data for the test.

6. Testing requirements

a. Each participating information provider must do a good job in environmental protection of the production system before the test, and do a good job in environmental restoration after the test is completed.

Note that test data cannot be released to the outside world.

b. During the test process, each participating information provider is asked to record the test phenomena and results in detail and check their correctness. If any abnormality is discovered, report it promptly.

c. After the test is completed, each participating information provider unit shall submit test feedback carefully and timely.

d. All Level-2 direct-connected users are required to participate in this test.
