## 2. Participating units

1. SSE INFONET CO.,LTD
2. Level-2 directly connected information providers and securities companies (core institutional access network users).

### **3. Test content**

Send Level-2 quotes (bidding, bonds, general trading), Level-1 quotes (bidding, bonds, general trading), HK Stock Connect quotes, etc. through LDDS system production environment.

In this test, the LDDS system will cooperate with the network optimization of the access network of the upstream core institutions to open up the environment for testing, and the participating users are invited to verify the reception and processing of quotes of Level-2, Level-1 and Hong Kong Stock Connect.

### **4. Test feedback content**

- a. Static files are received and processed normally (cpxx, fgy series files);
- b. Level-2 market quotation reception and processing situation;
- c. Level-1 market reception and processing situation;
- d. The reception and processing of Hong Kong Stock Connect quotations (if authorized);

e. The system recovers normally.

## 5. Test data

In this test, the LDDS system production environment used the end-of-day processing data of all securities in the Shanghai Stock Exchange on December 6, 2024 (Friday) as the starting data for the test.

## 6. Testing requirements

1. Each participating information provider must do a good job in environmental protection of the production system before the test, and do a good job in environmental restoration after the test is completed. Note that test data cannot be released to the outside world.

2. During the test process, each participating information provider is asked to record the test phenomena and results in detail and check their correctness. If any abnormality is discovered, report it promptly.

3. **Level-2 users are required to participate in this test.**

4. After the test is completed, each participating

information provider unit must submit test feedback in a timely manner.
