

LDDS new options trading platform second round of special test plan

1. Project Overview

to organize the second round of special testing of the new options trading platform in the LDDS system's all-weather testing environment from now until August 15 (Friday) .

2. Participating Units

1. Shanghai Stock Exchange InfoNet Ltd.
2. The LDDS system is directly connected to information providers and securities firms .

3. Test content

this test is to verify the reception and processing of option-related market information .

The test trading date is the same as the real trading date . The test contents are as follows:

Test Date	Test scenario	Test Description
From now until August 15 (Friday)	Pre-market static file market reception verification	participating units received the pre-market static files of options (reff03mdd.txt , reff0302YYYYMMDD.xml , zhcl03MMDD.txt) through the market gateway (VDE) for verification, and expected normal reception and processing.
	Real-time market verification	participating units receive option streams or file market information verification through the market gateway (VDE) , and the expected market information is received and displayed normally.
	After-hours market verification	The participating units received the option closing price file (clpr03mdd.txt) through the market gateway (VDE) for verification , and it was expected to be received and processed normally.

4. Test Feedback Content

1. Verification of the reception and processing of static files before option trading ;
2. Receive, process and verify real-time options market information (if authorized) ;

3. Receiving, processing and verifying after -hours options market information .

5. Test schedule

	Bidding Quotes		Options Quotes	
1	9:15-9:25	Opening Auction	9:15-9:25	Opening call auction
2	9:30-11 : 30	Continuous bidding	9:30-11:30	Continuous bidding
3	13:00-14:57	Continuous bidding	13:00-14:57	Continuous bidding
4	14:57-15:00	Closing call auction	14:57-15:00	Closing call auction
5	15:00-15:30	Related business processing	15:00-15:30	Related business processing

6. Test Data

The test data is based on the actual continuous test results in an all-weather test environment.

7. Test requirements

1. During the test, all participating information providers are requested to record the test phenomena and results in detail and check their correctness. If any abnormal phenomenon is found, it should be reported in time.

2. Each participating testing unit must ensure the isolation of the all-weather testing environment and the production environment to prevent test data from affecting production .

3. After the test is completed, each participating unit shall carefully fill in and submit feedback.
