

# **Third Round Specialized Testing Plan for the New Options Trading Platform in the LDDS System All- Weather Test Environment**

## **1. Test plan overview**

In accordance with the relevant work arrangement for the new options platform, our company plans to organize and conduct the third round of special tests for the new options trading platform in the **All-weather test environment** of the LDDS system from **now** until **Friday, September 5th**.

## **2. Participating Units**

All Level-2 Information Vendors

## **3. Test content**

The key focus of this test is to verify the reception and processing of options-related market data.

The test trading days will align with the actual trading days. The test content is as follows:

Test Date	Test Scenario	Test Description
From now until Friday, September 5th	Verification of Pre-Market Static File Market Data Reception	Participating entities shall verify the reception of pre-market static files for options (reff03mmdd.txt, reff0302YYYYMMDD.xml, zhcl03MMDD.txt) via the Market Data Gateway (VDE). Normal reception and processing of the files are expected.
	Real-Time Market Data Verification	Participating entities shall verify the receipt of options streaming market data or file-based market data via the Market Data Gateway (VDE). It is expected that the market data will be received and displayed normally.
	After-Market Market Data Verification	Participating entities shall verify the receipt of the options closing price file (clpr03mmdd.txt) via the Market Data Gateway (VDE). Normal reception and processing of the file are expected.

## 4. Test Feedback Content

- 1) Verification of the reception and processing of pre-market static files for options;
- 2) Verification of the reception and processing of real-time options

market data (if authorized);

- 3) Verification of the reception and processing of after-market options market data.
